# Polygons

- One of the lines that make a flat (2-dimensional) shape.

- Or one of the surfaces that make a solid (3-dimensional) object.

- An angle measures the amount of turn

- There are many different types of angles that make up a shape

acute    right    obtuse    straight    reflex    full rotation
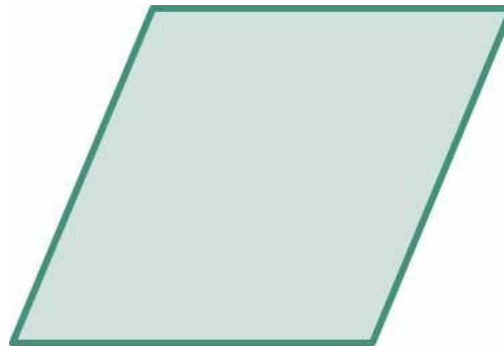

# Trapezoids

- A trapezoid has 4 sides

- Let's find one and draw one on our white boards together

# Parallelograms

- A Parallelogram is a flat shape with opposite sides parallel and equal in length.

- (Squares, Rhombus and rectangles are also parallelograms)

Academy Artworks

# Hexagons

- A hexagon has six sides

- Let's find one and draw one on our white boards together
